Legal Bases for the Processing

In the following, you will find an overview of the legal basis of the GDPR on which we base the processing of personal data. Please note that in addition to the provisions of the GDPR, national data protection provisions of your or our country of residence or domicile may apply. If, in addition, more specific legal bases are applicable in individual cases, we will inform you of these in the data protection declaration.

- **Consent (Article 6 (1) (a) GDPR)** - The data subject has given consent to the processing of his or her personal data for one or more specific purposes.
- **Performance of a contract and prior requests (Article 6 (1) (b) GDPR)** - Performance of a contract to which the data subject is party or in order to take steps at the request of the data subject prior to entering into a contract.
- **Compliance with a legal obligation (Article 6 (1) (c) GDPR)** - Processing is necessary for compliance with a legal obligation to which the controller is subject.
- **Legitimate Interests (Article 6 (1) (f) GDPR)** - Processing is necessary for the purposes of the legitimate interests pursued by the controller or by a third party, except where such interests are overridden by the interests or fundamental rights and freedoms of the data subject which require protection of personal data.

In addition to the data protection regulations of the General Data Protection Regulation, national regulations apply to data protection in Germany. This includes in particular the Law on Protection against Misuse of Personal Data in Data Processing (Federal Data Protection Act - BDSG). In particular, the BDSG contains special provisions on the right to access, the right to erase, the right to object, the processing of special categories of personal data, processing for other purposes and transmission as well as automated individual decision-making, including profiling. Furthermore, it regulates data processing for the purposes of the employment relationship (§ 26 BDSG), in particular with regard to the establishment, execution or termination of employment relationships as well as the consent of employees. Furthermore, data protection laws of the individual federal states may apply.

Security Precautions

We take appropriate technical and organisational measures in accordance with the legal requirements, taking into account the state of the art, the costs of implementation and the nature, scope, context and purposes of processing as well as the risk of varying likelihood and severity for the rights and freedoms of natural persons, in order to ensure a level of security appropriate to the risk.

The measures include, in particular, safeguarding the confidentiality, integrity and availability of data by controlling physical and electronic access to the data as well as access to, input, transmission, securing and separation of the data. In addition, we have established procedures to ensure that data subjects' rights are respected, that data is erased, and that we are prepared to respond to data threats rapidly. Furthermore, we take the protection of personal data into account as early as the development or selection of hardware, software and service providers, in accordance with the principle of privacy by design and privacy by default.

TLS encryption (https): To protect your data transmitted via our online services, we use TLS encryption. You can recognize such encrypted connections by the prefix https:// in the address bar of your browser.

Transmission of Personal Data

In the context of our processing of personal data, it may happen that the data is transferred to other places, companies or persons or that it is disclosed to them. Recipients of this data may include, for example, service providers commissioned with IT tasks or providers of services and content that are embedded in a website. In such a case, the legal requirements will be respected and in particular corresponding contracts or agreements, which serve the protection of your data, will be concluded with the recipients of your data.

Data Processing in Third Countries

If we process data in a third country (i.e. outside the European Union (EU), the European Economic Area (EEA)) or the processing takes place in the context of the use of third party services or disclosure or transfer of data to other persons, bodies or companies, this will only take place in accordance with the legal requirements.

Subject to express consent or transfer required by contract or law, we process or have processed the data only in third countries with a recognised level of data protection, on the basis of special guarantees, such as a contractual obligation through so-called standard protection clauses of the EU Commission or if certifications or binding internal data protection regulations justify the processing (Article 44 to 49 GDPR, information page of the EU Commission: https://ec.europa.eu/info/law/law-topic/data-protection/international-dimension-data-protection_en).

Erasure of data

The data processed by us will be erased in accordance with the statutory provisions as soon as their processing is revoked or other permissions no longer apply (e.g. if the purpose of processing this data no longer applies or they are not required for the purpose). If the data is not deleted because they are required for other and legally permissible purposes, their processing is limited to these purposes. This means that the data will be restricted and not processed for other purposes. This applies, for example, to data that must be stored for commercial or tax reasons or for which storage is necessary to assert, exercise or defend legal claims or to protect the rights of another natural or legal person. In the context of our

information on data processing, we may provide users with further information on the deletion and retention of data that is specific to the respective processing operation.

Use of Cookies

Cookies are small text files or other data records that store information on end devices and read information from the end devices. For example, to store the login status in a user account, the contents of a shopping cart in an e-shop, the contents accessed or the functions used. Cookies can also be used for various purposes, e.g. for purposes of functionality, security and convenience of online offers as well as the creation of analyses of visitor flows.

Information on consent: We use cookies in accordance with the statutory provisions. Therefore, we obtain prior consent from users, except when it is not required by law. In particular, consent is not required if the storage and reading of information, including cookies, is strictly necessary in order to provide an information society service explicitly requested by the subscriber or user. The revocable consent will be clearly communicated to the user and will contain the information on the respective cookie use.

Information on legal bases under data protection law: The legal basis under data protection law on which we process users' personal data with the use of cookies depends on whether we ask users for consent. If users consent, the legal basis for processing their data is their declared consent. Otherwise, the data processed with the help of cookies is processed on the basis of our legitimate interests (e.g. in a business operation of our online services and improvement of its usability) or, if this is done in the context of the fulfillment of our contractual obligations, if the use of cookies is necessary to fulfill our contractual obligations. For which purposes the cookies are processed by us, we do clarify in the course of this privacy policy or in the context of our consent and processing procedures.

Retention period: With regard to the retention period, a distinction is drawn between the following types of cookies:

- **Temporary cookies (also known as "session cookies"):** Temporary cookies are deleted at the latest after a user has left an online service and closed his or her end device (i.e. browser or mobile application).
- **Permanent cookies:** Permanent cookies remain stored even after the terminal device is closed. For example, the login status can be saved, or preferred content can be displayed directly when the user visits a website again. Likewise, user data collected with the help of cookies can be used for

reach measurement. Unless we provide users with explicit information about the type and storage duration of cookies (e.g., as part of obtaining consent), users should assume that cookies are permanent and that the storage period can be up to two years.

General information on revocation and objection (opt-out): Users can revoke the consent they have given at any time and also file an objection to processing in accordance with the legal requirements in Article 21 GDPR. Users can also declare their objection by means of the settings of their browser, e.g. by deactivating the use of cookies (whereby this may also limit the functionality of our online services). An objection to the use of cookies for online marketing purposes, can also be declared via the websites <https://optout.aboutads.info> and <https://www.youronlinechoices.com/>.

Business services

We process data of our contractual and business partners, e.g. customers and interested parties (collectively referred to as "contractual partners") within the context of contractual and comparable legal relationships as well as associated actions and communication with the contractual partners or pre-contractually, e.g. to answer inquiries.

We process this data in order to fulfill our contractual obligations. These include, in particular, the obligations to provide the agreed services, any update obligations and remedies in the event of warranty and other service disruptions. In addition, we process the data to protect our rights and for the purpose of administrative tasks associated with these obligations and company organization. Furthermore, we process the data on the basis of our legitimate interests in proper and economical business management as well as security measures to protect our contractual partners and our business operations from misuse, endangerment of their data, secrets, information and rights (e.g. for the involvement of telecommunications, transport and other auxiliary services as well as subcontractors, banks, tax and legal advisors, payment service providers or tax authorities). Within the framework of applicable law, we only disclose the data of contractual partners to third parties to the extent that this is necessary for the aforementioned purposes or to fulfill legal obligations. Contractual partners will be informed about further forms of processing, e.g. for marketing purposes, within the scope of this privacy policy.

Which data are necessary for the aforementioned purposes, we inform the contracting partners before or in the context of the data collection, e.g. in online forms by special marking (e.g. colors), and/or symbols (e.g. asterisks or the like), or personally.

We delete the data after expiry of statutory warranty and comparable obligations,

i.e. in principle after expiry of 4 years, unless the data is stored in a customer account or must be kept for legal reasons of archiving. The statutory retention period for documents relevant under tax law as well as for commercial books, inventories, opening balance sheets, annual financial statements, the instructions required to understand these documents and other organizational documents and accounting records is ten years and for received commercial and business letters and reproductions of sent commercial and business letters six years. The period begins at the end of the calendar year in which the last entry was made in the book, the inventory, the opening balance sheet, the annual financial statements or the management report was prepared, the commercial or business letter was received or sent, or the accounting document was created, furthermore the record was made or the other documents were created.

Otherwise, our newsletters contain information about our services and us.

In order to subscribe to our newsletters, it is generally sufficient to enter your e-mail address. We may, however, ask you to provide a name for the purpose of contacting you personally in the newsletter or to provide further information if this is required for the purposes of the newsletter.

Double opt-in procedure: The registration to our newsletter takes place in general in a so-called Double-Opt-In procedure. This means that you will receive an e-mail after registration asking you to confirm your registration. This confirmation is necessary so that no one can register with external e-mail addresses.

The registrations for the newsletter are logged in order to be able to prove the registration process according to the legal requirements. This includes storing the login and confirmation times as well as the IP address. Likewise the changes of your data stored with the dispatch service provider are logged.

Deletion and restriction of processing: We may store the unsubscribed email addresses for up to three years based on our legitimate interests before deleting them to provide evidence of prior consent. The processing of these data is limited to the purpose of a possible defense against claims. An individual deletion request is possible at any time, provided that the former existence of a consent is confirmed at the same time. In the case of an obligation to permanently observe an objection, we reserve the right to store the e-mail address solely for this purpose in a blocklist.

The logging of the registration process takes place on the basis of our legitimate interests for the purpose of proving its proper course. If we commission a service provider to send e-mails, this is done on the basis of our legitimate interests in an efficient and secure sending system.

Profiles in Social Networks (Social Media)

We maintain online presences within social networks and process user data in this context in order to communicate with the users active there or to offer information about us.

We would like to point out that user data may be processed outside the European Union. This may entail risks for users, e.g. by making it more difficult to enforce users' rights.

In addition, user data is usually processed within social networks for market research and advertising purposes. For example, user profiles can be created on the basis of user behaviour and the associated interests of users. The user profiles can then be used, for example, to place advertisements within and outside the networks which are presumed to correspond to the interests of the users. For these purposes, cookies are usually stored on the user's computer, in which the user's usage behaviour and interests are stored. Furthermore, data can be stored in the user profiles independently of the devices used by the users (especially if the users are members of the respective networks or will become members later on).

For a detailed description of the respective processing operations and the opt-out options, please refer to the respective data protection declarations and information provided by the providers of the respective networks.

Also in the case of requests for information and the exercise of rights of data subjects, we point out that these can be most effectively pursued with the

providers. Only the providers have access to the data of the users and can directly take appropriate measures and provide information. If you still need help, please do not hesitate to contact us.

Terminology and Definitions

This section provides an overview of the terms used in this privacy policy. Many of the terms are drawn from the law and defined mainly in Article 4 GDPR. The legal definitions are binding. The following explanations, on the other hand, are intended above all for the purpose of comprehension. The terms are sorted alphabetically.

- **Controller:** "Controller" means the natural or legal person, public authority, agency or other body which, alone or jointly with others, determines the

purposes and means of the processing of personal data.

- **Personal Data:** "personal data" means any information relating to an identified or identifiable natural person ("data subject"); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.
- **Processing:** The term "processing" covers a wide range and practically every handling of data, be it collection, evaluation, storage, transmission or erasure.
- **Profiles with user-related information:** The processing of "profiles with user-related information", or "profiles" for short, includes any kind of automated processing of personal data that consists of using these personal data to analyse, evaluate or predict certain personal aspects relating to a natural person (depending on the type of profiling, this may include different information concerning demographics, behaviour and interests, such as interaction with websites and their content, etc.) (e.g. interests in certain content or products, click behaviour on a website or location). Cookies and web beacons are often used for profiling purposes.
- **Web Analytics:** Web Analytics serves the evaluation of visitor traffic of online services and can determine their behavior or interests in certain information, such as content of websites. With the help of web analytics, website owners, for example, can recognize at what time visitors visit their website and what content they are interested in. This allows them, for example, to optimize the content of the website to better meet the needs of their visitors. For purposes of web analytics, pseudonymous cookies and web beacons are frequently used in order to recognise returning visitors and thus obtain more precise analyses of the use of an online service.
